

THE WRANGELL SENTINEL

Vol. 14. NUMBER 27.

WRANGELL, ALASKA, THURSDAY, JULY 8, 1915

\$2.50 PER YEAR, 10c. PER COPY

Why Not Give Us A Chance

It would seem from an article in the Ketchikan Miner by the Road Commissioner, Mr. Austin, and the comment thereon by the editor that there is some difference of opinion as to the character of the material and who should furnish the same for the building of what is known as the Charcoal Point road near Ketchikan. We certainly agree with the Miner that, if possible, home product should be used, and there is no question but the native Hemlock is far superior for street planking than Oregon or Washington fir. If Mr. Commissioner wants the real stuff for a good road why not give the Wrangell mills a chance to bid on furnishing it. They are equipped to do the job.

New Lighthouse Tender Coming

The new lighthouse tender Fern recently launched at the Eagle Harbor Yards, sailed for Alaska last Thursday. She is one of the finest boats of this type that ever took to water and operate on the inside passage.

Get the habit. The Rink is the place.

Minstrel Show Was Good

The "Alabama Minstrels", employees of the Sanitary cannery, all colored, gave an entertainment on Sunday evening at the Rink, that was above the average for amateur work. The work of Lou Harrison was certainly very clever and in fact the work of the whole company was above the average of amateurs.

Line Guns For Light Houses

Great difficulty has been experienced in the past in landing supplies and mail at the Scotch Cap and Cape Sarichef Light Stations, Alaska. Owing to the situation of the stations, the condition of the sea is very often unfavorable to making landing through the surf for days at a time. Measures have therefore been taken recently for the purchase of line-throwing guns for these stations and also for the Cape St. Elias Light Station, Alaska, now in course of construction, which, it is believed, will be very useful in landing mail and in connection with landing supplies and transferring the keepers to and from the stations during unfavorable weather.

Wrangell Has A Glorious Celebration

To say that Wrangell had a glorious fourth is putting it mildly, for last Sunday and Monday she surpassed any previous celebration that has ever been attempted in the city.

The big celebration started off with the double header base ball game Sunday afternoon. The first game being with Lake Bay which resulted in a score of 6 to 3 in favor of Wrangell. The feature of the game being the home run of Dawne and Lewis. Mr. Bidwell, of San Diago, Calif., did the catching for the home boys and L. Rhinehart the twirling. The Lake Bay boys put up a good game but luck seemed against them. The game was the best yet on the new grounds. Soon after the first game the boys took on the Metlakahtla Band Team, and Geo. Sylvester was placed in the box in the place of Rhinehart and in a five inning game the score stood 8 to 2 in favor of the home team again. The feature of this game was the pitching of Sylvester, he striking out the first nine men, which is exceptionally when you consider it the first game he has ever pitched. Taking it all around the boys all played great ball so keep it up boys and we wont take a back seat from any of 'em.

The Metlakahtla Concert Band that furnished the music for the Wrangell Fourth of July celebration certainly did much to enliven the occasion. They play high class music and are not a bit stingy with it, willing and ready at all times to "toot". We can safely say that every citizen of Wrangell, without exception, enjoyed the music rendered and appreciated the boys efforts to entertain to the full.

The events which were scheduled to take place, beginning at 9 o'clock, Monday morning, were delayed on account of rain, and the first event of the day was the patriotic exercises in Red Men's Hall, where a very entertaining program was rendered, Judge Thomas presiding in his usual able manner, after the rendition of the song "Red White and Blue" by the choir, Miss Pyers read a very entertaining paper of the history of the famous "Liberty Bell", reviewing the incidents of that memorial occasion when it rang out the glad tidings of the adoption of the Declaration of Independence. Following the rendition of the National Air by the band, Mr. Paul F. Stanhope read a paper descriptive of the events and conditions at the time on that memorable 4th of July, 1776. After a song by young ladies, Miss Lynn Worden read a paper which we think is worthy of careful perusal and we printing in full elsewhere.

After the exercises the street events were taken and we record them and winners on another page.

Engineer Overcome By Gas

Chief Engineer of the river boat Winifred, "Sandy" Clark, a short time after leaving port was found lying between the two engines in an unconscious condition, having been overcome by gas. The boat was at once turned about and Mr. Clark brought to town and placed under the care of a doctor, under whose treatment he speedily recovered and was able to resume his duties on today's trip. It was indeed fortunate that Mr. Clark was discovered so soon after being prostrated for a very few minutes would have certainly proved fatal.

Have You Lost Or Found Any

LOST—Crescent shaped brooch, nuggets and old ivory, last Monday evening about the Rink. Reward it returned to Miss Elenora Lynch.

FOUND—Small stick pin. Owner can have same by proving property and paying for this add. at the Sentinel Office.

FOUND—Bunch of keys. Call at Sentinel Office.

FOUND—Lens from a telescope or camera. Owner prove property and pay for this add. at Sentinel Office.

Big Time At Band Dance

The benefit dance given by the Metlakahtla Concert Band on Monday evening in the Rink was one of the most pleasurable events of all of the Fourth of July festivities. The music was of the very best, the participants being in the right mood for and certainly had a good time. Prof. Geo. H. Edison was floor manager and performed those duties in his usual elegant and pleasant manner.

"Live Wire" Bartlett Now At Juneau

Mr. Glen Bartlett, former manager of the Revilla Hotel in Ketchikan, was a passenger north on the Humboldt last Friday, for Juneau, where, it is reported, he will assume the management of the New Calif Hotel.

The war news as published in the daily press is somewhat like our old friend Finnegan who was "off agin and on agin".

Steamships Will Change Charter

The Dollar Steamship Co., which has a few of its ships under the American flag, has announced that it will change to some foreign flag and will be forced to withdraw its ships from American ports. This announcement, following several others, has caused a revulsion of feeling in Washington, and on June 2nd it was announced in a dispatch that the administration leaders were making a careful investigation realizing that the bill, which was put over without question by the representatives of the union labor, will result in merely destroying that market for all classes of labor in this country. Generally speaking, it is conceded to be one of the most gigantic blunders of the administration, and now it is said that the bill will be modified.—Railway & Marine News.

The Rink will be dark for a few nights but watch for the bills of the opening show.

Printing Point Does Not Bob Up and Down

In an L. C. Smith & Bros. Typewriter the point on the paper which is to receive the type impression is stationary at the instant the type hits. The carriage does not bob up and down when the shift is made to write capitals.

Why?

Because the *type* is shifted—not the *carriage*.

The only movement of the carriage is back and forth on its closely adjusted ball bearing runways—and this does not take place while the print is being made. There is no lifting of the carriage.

This is one reason why L. C. Smith & Bros. typewriting is free from blurs and every letter in the right place.

Postmaster	J. E. Waring
For professional and trade people see advertising columns.	

G. T. Waring, of Telegraph Creek, was a guest of the Wrangell Hotel this week.

With a three days celebration and the usual enthusiasm on such occasions, Wrangell was exceptionally quiet and orderly, no street brawls or disorderly conduct being apparent.

The Wrangell Drug Co. has on display in their window a shipment of the famous Orange Blossom candy, a California product. It is some sweet stuff.

Mr. Lewis Shequin, some twenty years ago a resident of Wrangell, has been in town for a few days renewing old acquaintances and may again take up his permanent residence in this vicinity.

Mr. Geo. M. Bidwell, wife and family, of San Diego, California, are here for their summer vacation. The Bidwells are well pleased with Wrangell and surrounding country as a place to spend a summer's outing, this being their second season here.

I. D. Nordyke formerly well known resident of Craig and for a short while at Wrangell, is credited by The Seward Gateway as being the energetic and efficient secretary of the Seldovia Promotion Club, Cook Inlet country. Any information that Cap. sends out can be relied upon.

R. F. Irwin in the employ of the Bureau of Fisheries, as warden, after spending a couple of months here, left for Juneau today on the Osprey, where he will exercise his duties as a Government official looking after the infractions of the federal law with reference to the taking of the food fish from the waters of Alaska. Mr. Irwin is a gentleman in every sense of the word, and we are sorry to lose him.

Notice

Scrap Book

Lepers and the Law.

The Norman-English laws enacted that a leper had neither power to sue in any court nor to inherit property. During his lifetime he was permitted to enjoy the usufruct of any property in his possession at the time he was "found guilty," so to speak, of leprosy, but all rights of disposition over it he lost.

Winning Success.

The secret of success lies in the man and not in the stuff he works on.—Tory.

No Humorist.

"What of his sense of humor?" "Well, he has to see a joke twice before he sees it once."—Lippincott's.

Wild Bees.

Wild bees will attack blossoms that the tame bees ignore. The bee from the woods does not seem to care for propagated flowers, nor will it enter any hive that has been placed for it, no matter how enticing the food there. It is far more vicious than its cultured brother.

Cute Boy.

Widow Eames—How would my little Johnny like a new papa?

Johnny aged five—Oh, you needn't show the 'sponsibility on me, ma. It isn't a new papa for me, but a new husband for yourself, that you are thinking about.

Sweeping.

"She swept the room with a glance." "Humph! A lot of help that was to her mother."

Navigators Have A Rough Trip

On Wednesday Mr. Phaenoude, of late becoming famous as companion and guide to visitors of the rod and reel, took Mr. Geo. M. Bidwell, of San Diego, Cal., out for a few days sport whipping the placid waters of Mill Creek. But alas, Pat had no more than got a "kick" or two out of the engine when it refused to be coaxed into action, however, the two of them, undaunted, applied their strength and energies to the oars that they might get out of sight and hearing of curious onlookers, where, undisturbed they might do to, and say things of, that engine that might be more or less shocking to the eyes and ears of persons of sensitive natures. They aver that they got the "bloomin" thing to work finally and arrived at Mill Creek in time to have a good days sport making a catch of about fifty fine trout.

It seems, however, that the real event of the day was on the return trip when they encountered a gale of wind that was unkind enough to pick the water up in bunches and hurl it in such quantities as to not only moisten both outer and under garments of the occupants of the boat, but put the engine again out of commission. "Capt." Pat, having had such recent and strenuous experience in navigating crafts of this sort, at once applied his knowledge and skill, aided by the high speed motive power of Mr. Bidwell, succeeded in making shore near the cannery, where a boat from town was sent to their rescue and succeeded in towing them safely into port about midnight.

Mr. Bidwell seems to have enjoyed his experience, of course with Pat it is getting to be an old story, and is contemplating another outing in the near future. Pat will doubtless call to his aid his old shipmate, McNerny, for the next trip.

A good show at the Wrangell Photoshow tonight.

Throw a PEBBLE into a Pool and see what a circle it makes. Throw an ADVERTISEMENT into this paper and you will also be surprised at the result.

Grand Staircase, Festive Court, Panama-Pacific Exposition.

Access.
THE grand staircase in the East or Festive Court, Panama-Pacific exposition, will divide the central group of exposition palaces from north to south. This court, representing the finest type of Spanish-Moorish architecture, is designed for pageantry upon a stupendous scale. Here pageants surpassing the durbar will be enacted, and here the nations upon the shores of the Pacific will meet in a series of oriental displays. Here the choral societies of America and Europe will meet in a song festival in 1915. The great tower of the court will contain an organ with echo organs in the bimini tower. From the huge staircase and from the roof gardens overlooking the court spectators will be enabled to see enacted a surpassing series of pageants.

WRANGELL - - ALASKA

**Paper Read By
Miss Worden**

The following paper was read
by Miss Lynn Worden at the
exercises at Red Men's Hall:

One hundred and thirty-nine
years ago thirteen united colonies
represented by a group of thoughtful,
earnest, farseeing men drew up
and presented to the King of Eng-
land a document which declared
them to be free and independent
states.

The spirit of courage and firm
resolve which marked the history of
that epoch has come down generation
after generation dominating every
age and foreshadowing every
great decision until finally it has
come to be called a characteristic
of the American people. Born in
and with natural rights and privileges
the descendants of those mighty
minds that proclaimed our destiny
our own have left behind a
glorious and honored past. What
time in history is more auspicious
than our present? And who shall
attempt to foresee a future that
stretches ahead with unlimited
promises of improvement?

We have made the aliens wel-
come to our shores. They have
come a social and an economic aid.
The English stock of the first
decade in America has become per-
manently broadened and strength-
ened. With the Dutch settlers in
New York and Pennsylvania came
energy and thrift; The Danes in
Delaware brought love of conquest
strength and hardihood; Germany
sent us scientists and inventors;
The Scotch-Irish blood made gen-
erals and statesmen and early
pioneers still we had room for more.
From Norway and Sweden came
settlers to make their homes in the
middle west. In the south Louisiana
lent French forces to culti-
vate the wilderness and subdue
the savages. With these pioneers
literature and romance were fanned
to flame. The courtly southern
gentlemen whose ancestry was
Anglo-Saxon, the Teutonic agriculturalist
of north and west, the
Celtic plantation-owner on the Gulf
mingle. Thus race characteristic
were moderated, sympathies were
extended, religions allowed to flour-
ish without coercion and the result
already realized is a strong and
indissoluble nation: wealthy in
tradition and peace; rich in free
and intelligent citizens.

And when the pressure to the
west had stopped with the Pacific
ocean, attention was drawn to the
northland. Alaska gave room to the
pioneers of a later age and in this
promising and fruitful land the
same flag blossoming with new stars
gave assurance of freedom and
protection.

Now when war with cruel and
impartial hand devastates the regions in
Europe that have been
peaceful for ages, America sets up
her declaration of neutrality and
her action is one of protest against
this awful calamity. Independence,
the key-note of her declaration in
'76 is still the foundation of her
present stand. Representing the
spirit of the law and order-justice
for all and freedom of speech;
America alone, stands for humanity
and brotherhood. Her people
under that proud flag, dwell in
harmony and practice the arts of
peace.

A good show at the Photoplay
tonight.

"What makes a banknote so attractive?"
"Its figure, probably."—Judge.

The man who argues is a mutt.
And he will surely rue it.
She'll say, "There's no use talking," but
She'll go ahead and do it.
—Cincinnati Enquirer.

Rhode Island's First Newspaper.
The first newspaper published in
Rhode Island was at Newport, 1732, by
Anne Franklin, a widow of the pub-
lisher. She was printer to the colony,
printing pamphlets, laws and almanacs,
as well as calicoes and linens.

Waterproofing Blocks of Wood.
A good way to harden small blocks of
wood used in the laboratory is to boil
them in olive oil for five to ten minutes,
says the Scientific American. Not
only are the blocks hardened, but they
may be used under water, as the process
makes them waterproof to a great
degree. If desired to be used for col-
lecting gases—that is, for supporting
bell jars under water—they may be
made further waterproof by first boiling
them in paraffin, then in olive oil.
This makes a wooden block hard and
waterproof and every way well adapt-
ed for use in pneumatic troughs.

A Heat Proof Bronzing Fluid.
Bronzing fluids as ordinarily made do
not stand very high temperatures.
Where this is desirable use the follow-
ing mixture: Cut "gear varnish" or any
hard varnish with turpentine to the
consistency of thin molasses, add 10
per cent of vinyl acetate and stir in
aluminum powder or other bronzing
powder to suit.

Chloroform.
Chloroform, the great anaesthetic,
was discovered by Guthrie in 1831 and
was first employed in surgical opera-
tions in 1847.

Care of Knives.
Nothing ruins ivory handled knives
so quickly as putting the handles into
water. Indeed, no knife should be put
entirely into water. Wash the blades
and wipe off the handles. If plunged
into water the water is apt to work its
way into the handle where the blade is
fastened and in time will rust the han-
dle so it cracks.

Spanish Nobles.
Spain's population about one-fif-
teenth are nobles, of whom four-fifths
are either paupers or on the verge of
poverty.

Watches Aboard Ship.
Ship's time is marked by "watches,"
afternoon watch being from midday
to 4 p. m., first dog watch from 4 to 6
a. m., second dog watch from 6 to 8
a. m., first watch from 8 to midnight,
middle watch from midnight to 4 a. m.,
morning watch from 4 to 8 a. m., and
forenoon watch from 8 a. m. to mid-
day.

Laces.
Lace was known in Venice at an
early period. It was not unknown to
the Greeks and Romans. To protect
the native article its importation into
England was prohibited in 1483.

Women in Tibet.
In Tibet the work of carpenters and
carvers is done by women. Women
conduct also a large part of the busi-
ness and perform much toil and drudg-
ery of various kinds. Two-thirds
Tibetan men are farmers.
"It is a rule the men
